LEAD LOOP™
SUTURING DEVICE

The **SUTURE CONCEPTS LEAD LOOP™ SUTURING DEVICE** is a unique and effective solution for securing implants to soft tissue in pain management procedures.

- > The Lead Loop™ device allows physicians to consider their approach to SCS procedures in a truly minimally invasive manner allowing for smaller incisions and reduced tissue disruption.
- > The Lead Loop™ is the next generation in knotless suture anchors, and uses a unique knotless suture retention system, that allows for circumferential capture of the lead anchor, with a simple tensioning technique and no need to tie knots.
- > Securing the lead anchor to a single point to in the fascia or intra-spinous/ supra-spinous ligament, gives physicians new confidence in reducing the rate of Lead Migration in SCS
- > The Lead Loop™, like traditional sutures, can be used with any approved SCS system, and their respective lead anchors

Ergonomic
Deployment
Handle

Preloaded with Knotless
CF PEEK Tissue Anchor
(1.7mm diameter, and 6.5mm length)

Preloaded with
Size-O High Strength
Suture (UHMWPE)

LEAD LOOP™ SUTURING DEVICE

CAT Number	Description
CATLLSD10	One (1) Lead Loop™ Suturing Device
CATLLSD20	Two (2) Lead Loop™ Suturing Devices

About Suture Concepts

Suture Concepts exists to provide simple and effective solutions to physicians who practice in a cost conscious environment. Leveraging our experience in medical device development and operational efficiency allows us to deliver cost appropriate, innovative, and novel solutions to surgeons and physicians. Suture Concepts' expertise is focused on employing solutions to secure soft tissue to tissue, bone, or other medical devices. Our combined years in medical device development, in particular sports medicine, gives us a unique perspective on soft tissue approximation problems in all areas of medicine. Suture Concepts is a venture capital backed early stage medical device company with offices in Basking Ridge, NJ and Beverley, MA.
